

# Ocular Imaging Research and Reading Center

## Device Certificate

Certificate ID: OIRRC-01-d4b0claa-G  
Transmission Number(s): 20210310-074622443  
Issue Date: Apr 15, 2021  
Valid until: Apr 15, 2025

Safety, tolerability and pharmacokinetics of single rising intravitreal doses and multiple intravitreal dosing of BI 754132 in patients with geographic atrophy secondary to age-related macular degeneration (open label, non-randomized, uncontrolled

**Sponsor:** Boehringer Ingelheim

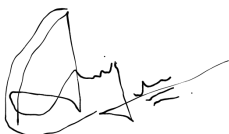

Site: Texas Retina Associates - Arlington  
Address: 801 West Randol Mill Road, Arlington, TX, United States  
Site Code: USA132

Device Information	
Device Modality	Optical Coherence Tomography
Device Manufacture	Optos, Inc.
Device Model	200TX
Device Serial Number	860-11510
Software Version	1.5.1.78

The sample images submitted to the OIRRC (transmission # 20210310-074622443) relevant to the abovementioned device are compliant with requirements and standards of **The 1418.0001 Study** imaging manual. The Ocular Imaging Research and Reading Center (OIRRC) is hereby issuing a certificate for the above-mentioned device for the use to obtain images in the **The 1418.0001 Study** study.

This certificate is valid for **4 years** from the time it is issued provided that no major modifications, upgrades, updates, or repairs are made during that period. It is the responsibility of the PI and the study team at the Study Site to maintain the integrity of the certification status of the above-mentioned device. Please, communicate with the OIRRC regarding such modifications or other conditions that can possibly affect or compromise the certification status of the device.
